Every Debt You Clear

A snowball has as many wins as you have debts. Write each one down, with the payment it hands you.

New payment = the payment you were sending + the minimum the cleared debt was taking

The total leaving your account does not change. Only the number of things it is split between.

	DEBT CLEARED	DATE	MINIMUM THIS FREES	MY NEW MONTHLY PAYMENT
1			$	$
2			$	$
3			$	$
4			$	$
5			$	$
6			$	$

On the example run printed in this pack, the four debts cleared in months 2, 7, 18 and 36.
The waits between them ran 2, then 5, then 11, then 18 months. They get longer every time.
That is the shape of the method, not a sign that anything has gone wrong.
